Low Stock products ⚠️

546

Inventory Value (₹ Lakhs)

₹ 22.43

Key Findings

- Inventory availability is 87.86%.
- 453 products are currently out of stock.
- 546 products require close monitoring.
- Cooking Essentials and Munchies hold the highest inventory value.
- Fruits & Vegetables contribute the lowest inventory value.

Business Recommendations

1. Prioritize replenishment of all out-of-stock products.
2. Establish automated reorder triggers for products below 5 units.
3. Review inventory allocation across high-value categories.
4. Optimize discount strategies for low-performing inventory.
5. Monitor products classified as "Monitor Closely".

Action Matrix

Priority Icon	Action	Impact
🟢 Low	Monitor Healthy Inventory	Low
🟡 Medium	Monitor Low Stock Products	Medium
🔴 High	Reduce Critical Stock Risk	High
🔴 High	Replenish Out of Stock Products	High
🟢 Low	Review Discount Strategy	Low
🟡 Medium	Review Inventory at Risk	Medium

Project Conclusion

The analysis identified 453 out-of-stock products and 546 low-stock products, resulting in an inventory risk exposure of ₹7.20 Lakhs.

Inventory availability remains healthy at 87.86%; however, critical replenishment actions are required to prevent future stockouts and maintain service levels.

This dashboard provides decision-makers with a centralized platform for inventory monitoring, risk identification, and replenishment planning.
